

MobiTap

By MobiloT

At MobiWire Group, we see SoftPOS technology as the future of payments. That is why we created the MobiTap, an affordable SoftPOS device powered by Android 14. Compact and equipped with advanced NFC technology, it offers a user-friendly interface for smooth payment processing.

The MobiTap is fully equipped with a durable silicone case, Type-C cable, and charger, all in a sleek, portable package to meet the demands of modern payment solutions.

NFC Technology

The MobiTap's front-facing NFC reader PN7160 by NXP®, quickly and smoothly detects payment cards within the NFC zone, ensuring a seamless, user-friendly experience with no transaction failures.

Pocket-sized Convenience

Designed for on-the-go merchants, the MobiTap features a 4.0" WVGA display and a slim 12.8mm profile for easy handling and portability. Weighing just 107g, it offers lightweight convenience with over-a-day battery life and reliable performance.

Android Upgradable

Powered by Android 14 and certified by Google, the MobiTap is future-ready with upgradeable software, ensuring it stays up to date with the latest features and security.

Product Description

KEY FEATURES

- Fleet Management (FOTA/MDM/Zero Touch)
- Online/Offline transactions
- Barcode/QR code
- SoftPOS ready

APP DEVELOPMENT ENVIRONMENT

- Android universe
- Google approved Software
- MobiloT advanced APIs, SDK
- Apps signature, Secure boot
